

Remote Disconnect Procedure

Document ID: SM-DC-007

Document Type: Procedure

Department: NOMC

Version: 1.0

Knowledge Base: Smart Meter AI Assistant — Synthetic Business Document

Purpose

Remote Disconnect is a controlled operation used to remotely disable supply when authorized.

Authorization

Verify meter identity, authorization, command eligibility, and required business conditions before execution.

Pre-checks

Initiate the command through the approved HES process and capture request time, status, response, and completion.

Execution

Confirmation must be based on the approved meter response and HES status, not merely command submission.

Confirmation

If the command fails, investigate communication, meter power, command status, network, and HES errors.

Exceptions

Record exceptions with enough evidence for operations and audit review.

Operational note

This is synthetic content created for local RAG development, testing, interview demonstration, and GitHub publication. It is not a confidential utility procedure or contractual document.
