

Meter Health Monitoring

Document ID: SM-HEALTH-012

Document Type: Operations

Department: NOMC

Version: 1.0

Knowledge Base: Smart Meter AI Assistant — Synthetic Business Document

Health indicators

Meter health monitoring provides an operational view of device availability and data quality.

Communication

Indicators include last communication, recent reads, missing intervals, communication failures, and command response history.

Electrical indicators

Electrical indicators can include voltage, current, power factor, and maximum demand. Abnormal values need context.

Events

Events can identify power failures, restorations, tamper, voltage issues, and communication conditions.

Dashboards

Dashboards should highlight stale meters, repeated failures, missing data, and SLA breaches.

Escalation

Escalation depends on severity, recurrence, business impact, and available troubleshooting evidence.

Operational note

This is synthetic content created for local RAG development, testing, interview demonstration, and GitHub publication. It is not a confidential utility procedure or contractual document.
