

Missing Data and Gap Handling

Document ID: SM-GAP-016

Document Type: Procedure

Department: NOMC/MDM

Version: 1.0

Knowledge Base: Smart Meter AI Assistant — Synthetic Business Document

Gap identification

Identify missing data against the expected schedule and applicable meter configuration.

Classification

Classify the gap by likely source: meter communication, network, HES collection, integration, MDM processing, or configuration.

Recovery

Recovery can include approved retries, backfill requests, historical collection, interface reprocessing, or documented recovery procedures.

Estimation

Estimation should be used only when authorized. Estimated values must be clearly flagged.

Validation

After recovery, validate interval count, timestamps, duplicates, and quality flags.

Closure

Close the issue only after root cause or approved operational disposition is recorded.

Operational note

This is synthetic content created for local RAG development, testing, interview demonstration, and GitHub publication. It is not a confidential utility procedure or contractual document.
