

Smart Meter Firmware Upgrade Procedure

Document ID: SM-FW-018

Document Type: Procedure

Department: NOMC/Technical

Version: 1.0

Knowledge Base: Smart Meter AI Assistant — Synthetic Business Document

Purpose

Firmware upgrades are controlled changes intended to improve functionality, security, stability, or vendor-supported behavior.

Pre-checks

Verify approved package, compatibility, device population, communication health, and change authorization.

Package validation

Validate package integrity and version before distribution.

Deployment

Monitor deployment status, communication success, device responses, and failure patterns.

Monitoring

Use approved rollback or recovery procedures where supported.

Rollback

After upgrade, verify firmware version, communication, critical functions, data collection, and event behavior.

Operational note

This is synthetic content created for local RAG development, testing, interview demonstration, and GitHub publication. It is not a confidential utility procedure or contractual document.
